PROFESSIONAL SUMMARY

Senior Full-Stack Software Engineer with 15+ years of experience designing and delivering scalable web applications across diverse industries including sports media, healthcare, loyalty & marketing platforms, and telecommunications. Strong expertise in TypeScript/JavaScript ecosystems (Angular, React, Node.js/NestJS) combined with hands-on backend experience in RESTful API design, database architecture (PostgreSQL), and cloud-based CI/CD pipelines (GitHub Actions, Azure DevOps).

Experienced in leading architectural decisions, conducting code reviews, and mentoring engineering teams. Proficient with AI/LLM tool integration (CrewAI, Gemini, GPT). Delivered production systems serving millions of users in high-availability environments.

TECHNICAL SKILLS

Languages:	TypeScript, JavaScript (ES2024+), PHP, Python, HTML5, CSS3/SCSS
Frontend:	Angular (v1–v19), React, Next.js, Ionic, Stencil (Web Components)
Backend:	Node.js, NestJS, Express, FastAPI, Symfony, Laravel, CodeIgniter, Zend Framework
Databases & ORM:	PostgreSQL, MySQL, MongoDB, Redis, TypeORM, Prisma
APIs & Protocols:	REST API design, GraphQL, WebSockets, OAuth2, JWT, OpenAPI/Swagger
AI/LLM:	CrewAI (multi-agent), Google Gemini, Claude, GitHub Copilot, OpenAI API, prompt engineering
DevOps & Cloud:	Docker, Docker Compose, GitHub Actions, Azure DevOps, AWS Amplify, CI/CD pipelines
Testing:	Jest, Vitest, Testing Library, Playwright, Cypress, PHPUnit
Security:	OWASP Top 10, input validation, parameterized queries, CSRF, secure headers, CORS, auth/session hardening, secrets management
Performance:	Core Web Vitals, Lighthouse, code splitting, lazy loading, caching, CDN
Tools:	Git, Jira, Confluence, Postman, Linux/bash

PROFESSIONAL EXPERIENCE

Freelance & Personal Projects

September 2025 – Present

- Developed full-stack real estate platform (NestJS + Next.js 15, Turborepo monorepo)
- Developing “Objekta” - real estate management platform (Python / FastAPI)
- Delivered both platforms end-to-end, from architecture and API design to CI/CD, E2E testing, and production deployment, with full ownership across the delivery lifecycle

Union Studio — Senior Software Engineer

Serbia / United States | April 2025 – August 2025

- Led frontend development for multiple health-support web and mobile applications targeting Android and iOS using Angular v19+ and Ionic Framework
- Delivered responsive, cross-platform UI components following accessibility best practices, reducing reported UX issues by ~30% during QA cycles
- Integrated Azure DevOps CI/CD pipelines (build, test, deploy) reducing deployment effort and increasing release cadence
- Applied SOLID principles and component-driven architecture ensuring maintainable, scalable codebase across multiple product teams
- Collaborated cross-functionally with design and backend teams on RESTful API contracts and feature scoping

Tech stack: TypeScript, Angular v19, Ionic, React, Node.js, PostgreSQL, Azure DevOps

Better Collective — Senior Software Engineer

Denmark / Serbia | November 2018 – November 2024 [6 years]

- Designed and developed AI-powered content generation tools using CrewAI multi-agent framework and LLM APIs, reducing manual editorial workload by ~60% on target workflows
- Full-stack revamp of Vegas Insider (vegasinsider.com) — a top-tier US sports-betting platform with millions of monthly active users; owned backend (PHP/Symfony) and frontend (custom Web Components / TypeScript) architecture
- Drove architectural and technical design decisions across a team of 8+ engineers; conducted code reviews and maintained engineering standards
- Mentored 3+ junior developers and guided 2 internship programs to successful completion
- Integrated GraphQL APIs and optimized complex PostgreSQL queries. Improved query performance by up to 2x on data-intensive pages.
- Introduced automated testing practices (Jest, Playwright) achieving >80% coverage on critical user flows

Tech stack: TypeScript, Angular, React, Node.js, PHP (Symfony, Laravel), PostgreSQL, GraphQL, Redis, Docker, GitHub Actions, CrewAI, OpenAI API

Horisen AG — Full-Stack Web Developer

Switzerland / Serbia | 2015 – 2018 [3 years]

- Built and maintained a comprehensive enterprise SaaS platform (HORISEN-pro) used by telecom and marketing clients across Europe
- Developed iCard loyalty program platform and SMS newsletter marketing system serving thousands of end users
- Delivered white-label online gaming applications for high-profile clients including Orange.pl and Ringier Axel Springer
- Implemented security hardening (XSS prevention, CSRF protection, secure session management) across all front-end and back-end applications
- Administered Linux-based deployment environments and maintained production services

Tech stack: PHP (Zend Framework), JavaScript, AngularJS v1.4+, Angular 2+, MySQL, Linux

Olymp Real-estates — Co-founder & Full-Stack Web Developer

Nis, Serbia | 2009 – 2015 [6 years]

- Co-founded and built a real estate management portal from the ground up: architecture, development, deployment, and ongoing maintenance
- Handled all aspects of the digital product including SEO, performance optimization, and digital marketing campaigns
- Delivered freelance web development projects for small and medium businesses

Tech stack: PHP (CodeIgniter), MySQL, JavaScript, HTML/CSS

Pixel Graphics — Owner & Web Developer

Nis, Serbia | 2005 – 2009 [4 years]

Provided web development, graphic design, and IT services to local businesses

EDUCATION

Specialty in Electro-Medical Equipment / School of Electrical Engineering 'Mija Stanimirovic', Nis

PROJECTS & OPEN SOURCE

Real Estate API Platform | github.com/aleksicdacha/RealEstatesAPI-NestJS

- Full-stack Turborepo monorepo: NestJS REST API + Next.js 15 admin panel + public website
- Features: TypeORM custom repository pattern, Google Gemini AI chatbot (multilingual), JWT auth, role-based access control, PostgreSQL, Redis, Docker Compose, GitHub Actions CI/CD

Tech stack: TypeScript, NestJS, Next.js 15, PostgreSQL, TypeORM, Redis, Docker, Playwright E2E
